SUMMARY

Telecommunications Engineering graduate from Telkom University Purwokerto with experience as a Network Operations Center (NOC) Engineer in data center operations, server infrastructure, and virtualization. Experienced in server installation, Proxmox VE, VMware ESXi, Linux/Windows Server administration, VM backup and restore, hardware maintenance, and network infrastructure support. Interested in IT Infrastructure, Data Center Engineering, and System Administration.

WORK EXPERIENCE

PT Cyber Smart Network Asia

Network Operations Center (NOC) Engineer

Oct 2025 - Present

- Performed installation, deployment, and maintenance of physical servers.
- Configured server hardware including RAID setup, memory upgrades, and basic hardware troubleshooting.
- Installed and managed virtualization environments using Proxmox VE and VMware ESXi.
- Deployed and managed virtual machines running Linux and Windows Server environments.
- Performed VM backup, restore, and migration processes using local storage and NAS/QNAP solutions.
- Configured server and virtual machine network settings including IP address, gateway, and connectivity requirements.
- Performed Linux server administration including SSH configuration, remote access, and basic system troubleshooting.
- Managed network infrastructure support including FortiGate Firewall, MikroTik configuration, NAT, and VPN configuration.
- Monitored server and network performance including CPU, RAM, storage capacity, and service availability using monitoring tools.
- Supported daily NOC operations, incident handling, and troubleshooting to maintain infrastructure reliability.

PT Indobot Academy

Digital Marketing & IoT Project Intern

Feb 2024 – Jun 2024

- Supported digital marketing activities through campaign preparation and content management.
- Created SEO-optimized articles for company websites to improve content visibility.
- Developed an IoT-based automatic irrigation system as a final project by integrating sensors, actuators, and data communication.

GraPARI Purwokerto

Telecommunication Technician Intern

Jan 2020 – Mar 2020

- Assisted in installation, maintenance, and troubleshooting of telecommunication systems.
- Performed field inspections to identify broadband connectivity issues.
- Supported network diagnostics, fiber optic handling, router setup, and modem configuration.

EDUCATION

Bachelor of Telecommunications Engineering

Sep 2021 - Aug 2025

- Telkom University Purwokerto
- Thesis on "Measurement of River Bed Contour Using Linear Movement Method".

Computer Network Engineering

Jul 2018 - Jun 2021

- Telkom Vocational School Purwokerto
- Relevant coursework in Networking, IT Infrastructure, and Systems Management.

ADDITIONAL INFORMATION

Technical Skills:

- Physical Server Installation & Deployment
- Basic Server Hardware Maintenance
- RAID Configuration
- Proxmox VE
- VMware ESXi
- Virtual Machine Deployment, Backup & Restore, Migration
- Linux Server Administration
- Windows Server Administration
- SSH Remote Access
- TCP/IP Networking
- IP Address Configuration
- Network Troubleshooting
- FortiGate Firewall Configuration
- MikroTik Configuration (Winbox)
- NAT and VPN Configuration
- Zabbix Monitoring
- Server Resource Monitoring (CPU, RAM, Storage)
- NAS/QNAP Backup Storage
